

## **Module: Certificate of Airworthiness Issue & Renewal**

### **Overview**

The issuance and renewal of a Certificate of Airworthiness are critical for ensuring aircraft safety. Governed by ICAO and AN(HK)O regulations, the process involves rigorous checks to ensure compliance with safety standards.

HKAR-21 Subpart H outlines specific requirements for obtaining and renewing the certificate, including proof of maintenance and adherence to airworthiness directives. Regular assessments ensure that aircraft remain compliant throughout their operational life.

The renewal process involves thorough inspections and documentation to maintain safety and reliability. By adhering to these regulations, organizations can ensure that their aircraft are fit for operation, thereby enhancing overall aviation safety.

**Programme Code**      M\_CoA

## **Programme Outline**

- Legislation in ICAO
- Legislation in AN(HK)O
- Requirements in HKAR-21 Subpart H
- Requirements in HKAR-1

**Programme Class**            Classroom face-to-face

**Contact Hours**            4 hours

**Certificate**                Certificate of Completion
