

Module: HKAR-21 Certification of Aircraft and relayted

Products, Parts and Appliances, DOA and POA

Overview

HKAR-21 is essential for the certification of aircraft, products, parts, and appliances, ensuring compliance with safety standards. It aligns with ICAO Annex 8, which governs aircraft airworthiness.

The regulations set forth in AN(HK)O establish requirements for design and production organizations (DOA) and production organizations (POA) to ensure that all components meet safety and quality standards.

Approval processes involve rigorous assessments of design and manufacturing practices to confirm compliance. This thorough certification process is crucial for maintaining aviation safety and reliability, ensuring that all products are fit for operational use. Continuous monitoring and adherence to HKAR-21 requirements help mitigate risks associated with aircraft operation.

Programme Code M_21

Programme Outline

- ICAO Annex 8 - Airworthiness of Aircraft
- AN(HK)O
- HKAR-21 Requirements
- Approval of Repairs

Programme Class Classroom face-to-face

Contact Hours 4 hours

Certificate Certificate of Completion
